Revenue per Visitor $\approx$ \$123-\$125
The rate, not the Total

Every region, heritage type, and heritage level charges almost exactly the same per visitor, never more than ~\$3 apart. Totals still vary a lot (National sites bring in \$2.56bn vs Local's \$1.48bn); that's a volume difference, not a pricing one. More visitors means more total revenue, but nobody's visitors are worth more per head.
